INDEX TO VOLUME LXIII

SOME REMARKS ON ITS USE.

In using this Index it should be noted that the principal entries cover the several stages of production : CULTIVATION (*see* Beet; Cane; Diseases; Fertilizer; Irrigation; Mechanization; Pests; Soil; Transport; Varieties; Weed Control, etc.); SUGAR PROCESSING (*see* Bagasse; Boilers; Boiling; Carbonatation; Centrifugals; Clarification; Crystallization; Diffusion; Evaporators; Filter; Massecuite; Mills; Milling; Molasses; Pans, Vacuum; Scale; Sucrose; Sugar; Sugars; Sulphitation; Water, etc.); REFINING (*see* Carbon; Refinery; Refining; White Sugar, etc.); and BY-PRODUCTS (*see* Alcohol; Animal Fodder; By-Products; Dextran; Fermentation; Paper; Pulp; Yeast, etc.).

Subjects covered separately include Ash; Bulk Handling, and Bulk Storage; Colour; Control, automatic and chemical; Countries; Gur; Ion Exchange; Juice; Micro-Organisms; pH; Polarization; Weighing, etc. Glucose and Fructose are to be found under Dextrose and Levulose. Moisture is given under Water. Obituaries, Statistics and Trade Notices are collected together under those headings. "Sucrose" implies the pure chemical; "Sugar" the commercial product; and "Sugars" the chemical family, rather than grades of sugar. When looking under the author's name, it should be remembered that the surname may be the penultimate in Spanish.
